The correct format for the CSI (called/calling station ID) is explained in RFC3580: uppercase and hyphen separated.

This code snipped for FreeRADIUS will capitalise and format correctly:

```
rewrite_calling_station_id {
      if (Calling-Station-Id =~/([0-9a-f]{2})[-:]?([0-9a-f]{2})[-:.]?([0-9a-
f]{2})[-:]?([0-9a-f]{2})[-:.]?([0-9a-f]{2})[-:]?([0-9a-f]{2})/i) {
               update request {
                       Calling-Station-Id := "%{toupper:%{1}-%{2}-%{3}-%{4}-
%{5}-%{6}}"
               }
      } else {
               noop
      }
}
```
