

Install a RadSecProxy Server

- Install Debian Buster/10 on hardware or a VM

```
apt-get update
```

```
apt-get install radsecproxy
```

- Use the configuration from the [code fragments](#) to configure RadSecProxy. Chances are that you'll need the older version (pre 1.8).
- Use the [online boarding form](#) to supply the RADIUS server details and receive the appropriate shared secrets.
- Install Centos 7 on hardware or a VM

```
yum install radsecproxy
```

- Use the configuration from the [code fragments](#) to configure RadSecProxy. Centos 7 installs a version newer than 1.8.
- Use the [online boarding form](#) to supply the RADIUS server details and receive the appropriate shared secrets.
